Revenue Report for June Posted on Tax.Illinois.Gov

SPRINGFIELD – The Illinois Department of Revenue has posted the latest [monthly revenue report](#) for June 2012 on its website. The report analyzes the major revenues the Illinois Department of Revenue (IDOR) Research Division forecasts – sales tax, individual income tax and corporate taxes. It examines how actual revenues compare with the previous year and with current budget estimates.

The Department of Revenue provides annual estimates use to develop the Governor’s budget and periodically revises those estimates as economic conditions warrant.

Editor Note: The Department of Revenue can send a copy of the report directly to you or a designated reporter. Please click on this link to subscribe.
