

The Service Occupation Tax is a tax imposed upon servicemen engaged in the business of making sales of service in this State, based upon the tangible personal property transferred incident to sales of service. See 35 ILCS 115/3. (This is a GIL.)

June 25, 2008

Dear Xxxxx:

This letter is in response to your letter dated October 18, 2007 in which you request information. The Department issues two types of letter rulings. Private Letter Rulings ("PLRs") are issued by the Department in response to specific taxpayer inquiries concerning the application of a tax statute or rule to a particular fact situation. A PLR is binding on the Department, but only as to the taxpayer who is the subject of the request for ruling and only to the extent the facts recited in the PLR are correct and complete. Persons seeking PLRs must comply with the procedures for PLRs found in the Department's regulations at 2 Ill. Adm. Code 1200.110. The purpose of a General Information Letter ("GIL") is to direct taxpayers to Department regulations or other sources of information regarding the topic about which they have inquired. A GIL is not a statement of Department policy and is not binding on the Department. See 2 Ill. Adm. Code 1200.120. You may access our website at [www.tax.illinois.gov](http://www.tax.illinois.gov) to review regulations, letter rulings and other types of information relevant to your inquiry.

The nature of your inquiry and the information you have provided require that we respond with a GIL. In your letter you have stated and made inquiry as follows:

I am writing to formally request a letter from your legal department, listing taxable items specific to cable service. In most states, tax is imposed on gross receipts, which includes cable service itself, installations, disconnects, reconnects, maintenance and rentals. Please let me know if sales tax in your State pertains to any or all of the above as well as internet, late and NSF check fees.

Thanks in advance for your help with this.

**DEPARTMENT'S RESPONSE:**

The Illinois Retailers' Occupation Tax Act imposes a tax upon persons engaged in this State in the business of selling tangible personal property to purchasers for use or consumption. See 86 Ill. Adm. Code 130.101. In Illinois, Use Tax is imposed on the privilege of using, in this State, any kind of tangible personal property that is purchased anywhere at retail from a retailer. See 86 Ill. Adm. Code 150.101. These taxes comprise what is commonly known as "sales" tax in Illinois.

Illinois Retailers' Occupation and Use Taxes do not apply to sales of service that do not involve the transfer of tangible personal property to customers. However, if tangible personal property is transferred incident to sales of service, this will result in either Service Occupation Tax liability or Use Tax liability for the servicemen depending upon his activities. For your general information see of 86 Ill. Adm. Code 140.101 through 140.109 regarding sales of service and Service Occupation Tax.

Under the Service Occupation Tax Act, businesses providing services (*i.e.* servicemen) are taxed on tangible personal property transferred as an incident to sales of service. See 86 Ill. Adm. Code 140.101. The purchase of tangible personal property that is transferred to the service customer may result in either Service Occupation Tax liability or Use Tax liability for the servicemen depending upon his activities. The serviceman's liability may be calculated in one of four ways: (1) separately-stated selling price of tangible personal property transferred incident to service; (2) 50% of the servicemen's entire bill; (3) Service Occupation Tax on the servicemen's cost price if the servicemen are registered de minimis servicemen; or (4) Use Tax on the servicemen's cost price if the servicemen are de minimis and are not otherwise required to be registered under Section 2a of the Retailers' Occupation Tax Act.

Using the first method, servicemen may separately state the selling price of each item transferred as a result of the sale of service. The tax is then calculated on the separately-stated selling price of the tangible personal property transferred. If the servicemen do not separately state the selling price of the tangible personal property transferred, they must use 50% of the entire bill to the service customer as the tax base. Both of the above methods provide that in no event may the tax base be less than the servicemen's cost price of the tangible personal property transferred. See 86 Ill. Adm. Code 140.106.

The third way servicemen may account for their tax liability only applies to de minimis servicemen who have either chosen to be registered or are required to be registered because they incur Retailers' Occupation Tax liability with respect to a portion of their business. See 86 Ill. Adm. Code 140.109. Servicemen may qualify as de minimis if they determine that the annual aggregate cost price of tangible personal property transferred as an incident of the sale of service is less than 35% of the total annual gross receipts from service transactions (75% in the case of pharmacists and persons engaged in graphics arts production). Servicemen no longer have the option of determining whether they are de minimis using a transaction by transaction basis. Registered de minimis servicemen are authorized to pay Service Occupation Tax (which includes local taxes) based upon their cost price of tangible personal property transferred incident to the sale of service. Such servicemen should give suppliers resale certificates and remit Service Occupation Tax using the Service Occupation Tax rates for their locations. Such servicemen also collect a corresponding amount of Service Use Tax from their customers, absent an exemption.

The final method of determining tax liability may be used by de minimis servicemen that are not otherwise required to be registered under Section 2a of the Retailers' Occupation Tax Act. Such de minimis servicemen handle their tax liability by paying Use Tax to their suppliers. If their suppliers are not registered to collect and remit tax, the servicemen must register, self-assess and remit Use Tax to the Department. The servicemen are considered to be the end-users of the tangible personal property transferred incident to service. Consequently, they are not authorized to collect a "tax" from the service customers. See 86 Ill. Adm. Code 140.108.

The provision of cable television is not a sale of tangible personal property and is not subject to the Retailers' Occupation Tax or the Service Occupation Tax. The sale of tangible personal property such as decoders, television receivers, recorders or cables would be subject to tax. However, if these items are not sold to customers but are provided as part of the cable television service, the cable operator would be considered a serviceman and would be subject to either Service Occupation Tax or Use Tax as described above.

The Telecommunications Excise Tax is imposed upon the act or privilege of originating or receiving intrastate or interstate telecommunications in Illinois at the rate of 7% of the gross charges for such telecommunications purchased at retail from retailers. See 86 Ill. Adm. Code 495. Pursuant

to Section 495.100(a), "gross charge" means the amount paid for the act or privilege of originating or receiving telecommunications in this State and for all services and equipment provided in connection therewith by a retailer, valued in money, whether paid in money or otherwise, including cash credits, services and property of every kind or nature, and shall be determined without any deduction on account of the cost of such telecommunications, the cost of material used, labor or service cost or any other expense whatsoever. These items are fully included in gross charges subject to the Telecommunications Excise Tax.

Generally, the provision of cable television service is not subject to the Telecommunications Excise Tax. Charges for video and audio programming, service charges, installation charges and disconnect charges are not subject to tax. However, if the cable operator provides telephone service over the cable infrastructure, the Telecommunications Excise Tax is imposed on the gross charges for the telephone service.

Generally, persons that provide their subscribers access to the Internet and who do not, as part of that service, charge customers for the line or other transmission charges which are used to obtain access to the Internet, are not considered to be telecommunications retailers. See 86 Ill. Adm. Code 495.100(d). It is our general understanding that most Internet access providers do not, as part of their billing, charge customers for such line charges, but instead, pay to their telecommunications providers all transmission costs that they incur in providing the service. The single monthly fee charged by such retailers, which often represents a flat charge for a package of items including Internet access and E-mail, would generally not be subject to the Telecommunications Excise Tax. However, please note that persons providing customers with the Internet access described above, but who also separately assess customers with per minute charges for such access are considered to be telecommunications retailers. Such retailers will incur Telecommunications Excise Tax on charges made for such access services. If, however, such Internet service providers do not separately assess customers with per minute charges, but pay their own providers for all transmission costs for all telecommunications service, they are not considered to be telecommunications retailers.

If Internet access service providers provide both transmission and data processing services, the charges for each must be disaggregated and separately identified. See 86 Ill. Adm. Code 495.100(c). The statute does not require disaggregation on the customers' invoice, however. Therefore, it is the Department's position that so long as the non-telecommunications charges are disaggregated from the telecommunications charges in the retailers' books and records, for audit purposes, such disaggregation need not be shown on the customers' invoice. If the non-telecommunications charges are not disaggregated from the telecommunications charges, the full amount will be subject to Telecommunications Excise Tax. If none of the charges billed were for telecommunications, then none of the charges would be subject to tax.

I hope this information is helpful. If you require additional information, please visit our website at [www.tax.illinois.gov](http://www.tax.illinois.gov) or contact the Department's Taxpayer Information Division at (217) 782-3336. If you are not under audit and you wish to obtain a binding PLR regarding your factual situation, please submit a request conforming to the requirements of 2 Ill. Adm. Code 1200.110 (b).

Very truly yours,

Richard S. Wolters  
Associate Counsel
