General Information

From July 1, 2023 through December 31, 2032, sustainable aviation fuel (SAF) sold to or used by an air carrier, certified by the carrier to be used in Illinois, earns a credit in the amount of \$1.50 per whole gallon of SAF purchased. The credit earned shall be referred to as the Sustainable Aviation Fuel Purchase Credit (SAFPC). Only that portion of each gallon of aviation fuel that consists of SAF, as defined in 35 ILCS 105/3-87, is eligible to earn the credit.

The credit is earned at the time SAF is purchased for use in Illinois. The amount of credit that is earned is based on the number of whole gallons of SAF purchased for use in Illinois. Partial gallons will not earn a credit. Credits may be used at the same time as they are earned. A qualifying purchase is considered to take place as of the date of invoice of the SAF. The credit is considered to be earned on SAF that is purchased under an installment contract or progress payment contract at the time that each installment or progress payment is invoiced and based on the number of whole gallons of SAF purchased by the installment or progress payment.
